Assistive Technology (A.T.) Accessibility, Devices, Adaptation Aids/Product Assessment

An assessment is conducted to review individuals assistive technology needs. An assessment to determine the client’s needs for specialized A.T. products to increase an individual’s safety, independence and activities of daily living and access will be provided. This service can be done on-site, through case review or over the telephone with the client.

Description:

On-Site, Case or Phone Accessibility Assessment for Adaptive Aids/Products

Determination of product/services to meet your client’s need for grater access in their environment to ensure accessibility.

Consultation with file review, client, supervisor or case manager.

On-site or telephone consultation to determine

- viable home or specific accessibility
- adaptive aids, A.T. devices or interventions required.

Environmental Accessibility Adaptations Report

A typed report will detail the findings of adaptive aids, A.T. devices or products required from the assessment. The report will also include any follow-up discussions regarding the client’s product needs.

Research

Research includes, but is not limited to, recommended A.T. interventions, ADL related products and or environmental adaptations. Associated pricing with product descriptions and vendor options will be provided.

Price Bids, Product Descriptions & Purchasing

Will be provided if required on client’s needs for an accessible products or environmental adaptations. Product descriptions will include pictures, pricing, and training options. Purchasing products for clients will also be provided. Product purchases must be approved and agreed to by Client and Case Manager.
